

Addressing the Security and Compliance Challenges of Your Department and Your Business

CSPi's Vital Security Auditing solution-Powered by **Netwrix** provides full transparency of your managed environment and delivers complete visibility into IT infrastructure.

Continuously detect data security threats, both on premise and in the Cloud; Complete visibility with user behavior analysis and security intelligence about critical changes, data access and configurations in hybrid IT environments. This makes it easy to investigate any suspicious action or security policy violation so the best response can quickly be determined.

Pass compliance audits with less effort and expense; Get the evidence required to prove that your organization's IT security program adheres to PCI DSS, HIPAA, GDPR, SOX, GLBA, FISMA, NIST, FERPA, CJIS, NERC CIP, ISO/IEC 27001 and other standards. You also get easy access to your complete audit trail for more than 10 years.

Increase the productivity of your IT security and operations teams; No need to go through weeks of log data to answer questions about who changed what or when and where a change was made. Nor do you need to painstakingly write, maintain and run scripts to identify inactive users, report on effective user permissions or perform software inventory tasks.

Benefits:

- Detect insider threats in hybrid cloud environments
- Pass compliance audits more easily
- Mitigate the threat of encryption ransom ware
- Spot threats with user behavior analytics
- Establish proper data access governance
- Reduce risk and costs with file analysis

Strengthen Security and Streamline Compliance

Full Transparency of your Managed Environment

Get a complete picture of third party actions across your environment

- **Monitor changes to critical configurations**
Get a high-level overview of changes made to critical configurations of managed environments with Enterprise Overview Dashboards
- **Control Access to Your Data**
Get a complete picture of the effective permissions for specific folders or attempts to access your sensitive files.
- **Monitor Privileged Users Activity**
Monitor what third parties are doing in managed environments via Screen Activity Video Recording

Compliance as a Service

Pass compliance audits: PCI DSS, HIPAA, SOX, FISMA, ISO 27001 and others.

- **Get a Single Point of Access to the Audit Trail**
Netrix Auditor enables security controls across your entire IT infrastructure by supporting the broadest variety of audited systems, and serves as a single point of access to the complete audit trail.
- **Prove Compliance with Data**
State-in-time™ reports allow you to provide details on security configurations at any point in time so you will be able to prove to auditors that specific processes and controls are and were always in place.
- **Out-of-the-box Compliance Reports**
prove your compliance with hard data by providing out-of-the-box reports mapped to specific regulatory compliance standards
- **Access to Audit Trail for More Than 10 Years**
Keep a complete audit trail archived for more than 10 years for later review and periodic checks by auditors.

Our Promise.

- ☑ One monthly fee for total Managed IT Services support.
- ☑ A strategic ongoing partnership built on industry standards and total alignment to your core business goals.
- ☑ A support plan tailored to meet the needs of your business with a structured response and maintenance agreement.
