Vital™ Managed Backup and Disaster Recovery

Protect Your Critical Data, Protect Your Business

In today's world, disasters can manifest in various ways, such as fires, floods, natural calamities, cyber attacks, human errors, and more. Regardless of the cause, these disasters can inflict severe damage on your business, particularly when it comes to your valuable data.

Consider the scenario of a catastrophic loss of crucial business data; the consequences can be long-lasting, potentially even permanent, impairing your organization's ability to function effectively. Even a temporary disruption in data can have a significant impact and may lead to your business being incapacitated for days, weeks, months - or worse. While physical assets can be repaired or replaced, the same cannot be said for data.

Vital™ Managed Data Backup and Disaster Recovery Services, offers a comprehensive answer to these challenges. With our robust services, we provide unmatched levels of availability to mitigate the possibility of data loss and ensure optimal data protection. Leveraging advanced virtualized technologies, we guarantee round-the-clock backup and recovery of your crucial data and applications, fully supported by our industry-leading service level agreements (SLAs).

By adopting our services, you can proactively prepare for unforeseen circumstances and benefit from adaptable disaster recovery solutions tailored precisely to your business requirements.

With Vital™ Managed Data Backup and Disaster Recovery Services, you can rest assured knowing that your organization is equipped to handle any unexpected events while maintaining the flexibility necessary to thrive.
□

Experience uninterrupted business operations and enjoy complete peace of mind with Vital™ Managed IT Services.

No matter the extent of your data backup and disaster recovery needs, Vital™ offers a solution that perfectly suits your requirements. From simple archival backups to robust high-performance disaster recovery options, we have you covered. With Vital™, your data is safeguarded as if it were stored in your own dedicated repository, ensuring the utmost protection for your business.

Key Features:

□ **Comprehensive Backup:** Secure and efficient backup solutions tailored to meet your specific needs

□ **Ongoing Management:** Continuous monitoring and management of backup and recovery processes

□ **Virtualized Technologies:** Utilization of virtual environments for rapid data recovery and reduced downtime

□ **SLA-backed Services:** Industry-leading service level agreements to guarantee performance and availability

□ **Data Protection:** Encryption of data at source, during transmission, and at rest for enhanced security

□ **Seamless Integration:** Compatibility with existing server infrastructures and preferred backup strategies

□ **Flexibility:** Options for offsite storage, data recovery "over the wire," or encrypted media delivery

Experience uninterrupted business operations and enjoy complete peace of mind with Vital™ Managed IT Services.

No matter the extent of your data backup and disaster recovery needs, Vital™ offers a solution that perfectly suits your requirements. From simple archival backups to robust high-performance disaster recovery options, we have you covered. With Vital™, your data is safeguarded as if it were stored in your own dedicated repository, ensuring the utmost protection for your business.

Data Backup

Vital™ Managed Backup as a Service offers affordable remote cloud-based storage for your existing server infrastructures. Whether you prefer it as your primary backup solution or an additional backup repository, our powerful service guarantees swift recovery times. With Vital™ Managed Backup as a Service, you can restore your backed-up data in a virtual environment within a matter of hours, aligning with your recovery time objective (RTO). When it comes to your data, failure is simply not an option.

Disaster Recovery

Disaster recovery and business continuity planning are ongoing processes that demand consistent management. While data backup is a crucial initial step, it may not fully resolve the problem or expedite recovery sufficiently in the event of a disaster. That's why you need a comprehensive disaster recovery solution that swiftly restores your operations to normalcy.

With Vital™ Disaster Recovery solutions, you can have peace of mind, knowing that your business can quickly recover and your critical data is always accessible, even in the face of catastrophic disruptions and data loss incidents. Our solutions are designed to operate seamlessly in both traditional and virtual environments, providing you with the reliability, security, and protection you need.

Benefits:

☐ **Business Continuity:** Minimizes the risk of data loss, ensuring uninterrupted operations

☐ **Peace of Mind:** Reliability and security measures to protect valuable business data

☐ **Swift Recovery:** Rapid restoration of data and applications to reduce downtime

☐ **Customizable Solutions:** Scalable and adaptable services that align with specific business requirements

☐ **Proactive Approach:** Ongoing management and monitoring to address potential risks and vulnerabilities

CSPi Technology Solutions offers Professional Services, Managed IT Services, and Cloud Services to assist clients in architecting and managing a secure, high-performance, and highly available IT infrastructure. Our engineers have industry experience and specialized certifications in networking, wireless & mobility, unified communications & collaboration, data center, and advanced security technologies, ensuring tailored solutions for our clients' needs.
