

Vital™ Managed Security Service

Empower Business Growth with Effective Cybersecurity

In today's landscape, security is the top priority for organizations across industries and sizes. The number of cyber-attacks continues to rise, with threats and attackers becoming increasingly sophisticated. Keeping up with security innovation and managing environments can be challenging, especially for organizations with limited resources, such as small businesses facing budget constraints, inadequate IT staffing, and a shortage of security skills.

If you find security challenges keeping you up at night, CSPi Technology Solutions' Vital™ Managed Security Services is the ideal solution. Our comprehensive security approach, offered as a cost-effective managed service, allows you to mitigate risks and strengthen your overall defenses.

As a trusted partner, we complement your team by securely managing your multi-vendor, multi-technology IT environment in both cloud and on-premise setups. This allows your team to focus on strategic business priorities, driving business growth.

End-to-End Security Coverage

Vital™ Managed Security Service covers all aspects of IT security, including data, network, and endpoint security, advanced threat intelligence and prevention, reporting and forensics, and remote access. We provide everything you need to achieve comprehensive IT security.

To ensure maximum protection against internal and external threats, we proactively set real-time alerts to detect anomalous user or device behavior, often the first sign of attempted breaches, ransomware, or other threats. We also monitor and analyze your security logs using sophisticated business rules to determine which alerts require investigation and whether new alerts should be created.

Additionally, our real-time security intelligence feeds provide you with up-to-date information to identify emerging threat signatures, viruses, and outbreaks. This grants you maximum visibility into regional and global trends, enabling us to take proactive steps to remediate possible breaches swiftly.

Cost Reduction through a Single Vendor Partnership

We understand that small businesses cannot afford complex security solutions or the staff to manage them. By choosing CSPi Technology Solutions as your Managed Security Services

Provider (MSSP), you can achieve significant cost savings

Vital™ Managed Security Service follows an ongoing partnership approach, tailored to your security objectives. We offer a flexible delivery model that caters to your security requirements, whether it's on-premise, off-premise, or in the cloud. With one low monthly fee, we handle the rest.

Benefits:

- ❑ Safeguard your assets, block attacks, and continuously monitor your network
- ❑ Relieve the burden of security management and fortify your network against hackers, bots, and various threats
- ❑ Proactively prevent attacks through constant threat prevention, intelligence, and analysis tools available 24/7/365
- ❑ Stay informed with real-time alerts, enabling prompt investigation of suspicious activities and proactive prevention of successful attacks
- ❑ Attain a comprehensive solution for security monitoring, enhanced visibility, and adherence to compliance requirements

Comprehensive Service Around the Clock

Vital™ Managed Security Service safeguards your organization through 24/7 surveillance and mitigation of malware, worms, and internet-based attacks. We provide you with all the necessary tools for security monitoring, visibility, and compliance, including:

- Up-to-date global threat intelligence through a worldwide network of threat sensors
- 24/7 managed or monitoring service levels tailored to your needs
- A comprehensive web portal for maximum visibility into network activity
- Periodic policy tuning to optimize security and throughput performance
- Real-time alerts and comprehensive security reports
- Real-time notifications on mobile devices, email, or phone

Secure Your Business Today

As a small business, you require cost-effective and proven security solutions that offer end-to-end protection and ease of use. Vital™ Managed Security Service delivers these benefits through a comprehensive security solution, supporting your business growth every step of the way.
