# CSPi

## Is the Cloud Really Safe?

### Protect Users from Threats

**43**%

**43%** of all data storage and data management will be in the cloud by **2019**[1]
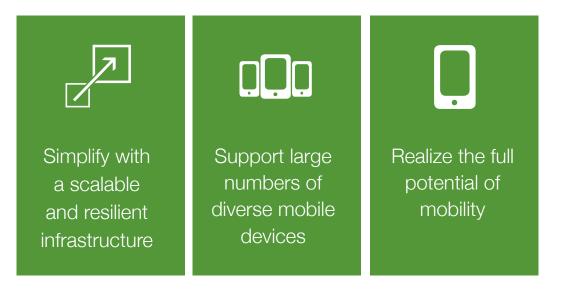

## Problem

Securing data is an ongoing challenge as more companies choose the cloud to counteract management challenges and the need to modernize infrastructures.

## Solution

A cloud-enabled network infrastructure combined with next-generation security platforms.

## Set Up and Secure Your Cloud Infrastructure

**Juniper Unite from Juniper Networks®** and **CSPi's Myricom ARC Series** work together to build a cloud-based network that keeps your cloud data safe. You'll reap benefits like these:

Simplify with a scalable and resilient infrastructure

Support large numbers of diverse mobile devices

Realize the full potential of mobility

## Top Cloud Security Benefits

**95**%
of cloud security failures will be the customer's fault by 2020, according to Gartner[2]

### With Juniper Networks and CSPi, you can prevent that with:

**1**
Mitigating network risks

**2**
Detailed data analysis & monitoring

**3**
Perimeter, anti-virus & malware protection

## Why Choose CSPi for Your Juniper Products?

CSPi is a Juniper Networks® Elite Partner with a highly successful track record when it comes to fulfilling the security needs of mid-size to large companies.
