Vital™ Managed Monitoring and Management Services

Your Business, Always Connected: Vital™ Managed Monitoring and Management Services

Your IT infrastructure is crucial to the success of your business. Any downtime can have severe consequences, affecting your reputation, productivity, and financial performance. That's why ensuring the continuous monitoring and management of your network is essential.

However, you may lack the time, budget, staff, or expertise to handle these tasks in-house. Your resources are better utilized focusing on strategic IT initiatives rather than daily management responsibilities.

Introducing CSPi's Vital™ Managed Monitoring and Management Services. As part of our comprehensive Vital™ Managed IT Services portfolio, this offering provides 24/7/365 oversight of your entire IT infrastructure, backed by service-level agreements (SLAs). Our comprehensive network service combines endpoint and server management with proactive infrastructure management to deliver optimal network performance and availability.

Here are the key benefits of our service:

☐ **Peace of Mind:** Enjoy round-the-clock monitoring and management services, providing you with confidence that your network is secure and functioning optimally at all times.

☐ **Simplified IT:** Partnering with CSPi means working with a trusted vendor that can handle all your monitoring and management needs, eliminating the need for multiple providers and streamlining your IT operations.

☐ **Resource Optimization:** Free up your internal IT resources to focus on strategic initiatives that drive your business forward, while we handle the daily tasks of monitoring and managing your network.

☐ **Hassle-Free Setup:** We take care of the installation, configuration, and management of monitoring software, saving you time and effort.

☐ **Cost Savings:** By outsourcing your network monitoring and management to us, you can reduce operational costs and increase productivity, ensuring that your IT budget is allocated effectively.

Key Features:

☐ **Simplified Billing:** One monthly fee for comprehensive Managed IT Services support.

☐ **Strategic Partnership:** A long-term partnership based on industry standards and complete alignment with your core business objectives.

☐ **Customized Support:** A tailored support plan that caters to the unique needs of your business, backed by a structured response and maintenance agreement.

Our Vital™ Managed Monitoring and Management Services encompass a wide range of network monitoring capabilities, including:

- ☐ **Network Topology:** Automated network mapping, IP address management, and comprehensive network documentation.
- ☐ **Device Management:** Remote management of in-app browsers, remote browsers, and other interfaces and devices.
- ☐ **User and Credential Management:** Enhanced security through password management, two-factor authentication, and role-based user access controls.
- ☐ **Proactive Network Monitoring:** Real-time monitoring of alerts, notifications, service performance, usage data, and health statistics to identify and address issues promptly.
- ☐ **Troubleshooting Assistance:** Expert analysis of network evidence and data to optimize configuration, restore settings, and improve network performance and stability.

In addition to our monitoring and management services, our dedicated team provides a range of additional services and support, including IT advisory services, help desk support, antivirus deployment, patch management, backup services, server optimization, firewall and router management, and advanced infrastructure monitoring.

Partner with CSPi for Vital™ Managed Monitoring and Management Services and experience reliable, efficient, and comprehensive network monitoring and management that allows you to focus on your core business objectives.
