Cybercrime is the new face of organized crime and the fastest growing crime in the United States, increasing in size, sophistication and cost. It’s wreaking havoc in both public and private enterprises, causing devastating losses, financially and to organizations’ reputation for years. From lost business to regulatory fines and remediation costs, data breaches can have far-reaching costs.

In today’s digital and cloud computing era, companies are at a higher risk of attacks and data breaches than ever before. For most companies, the risk is exponentially increased by the inability to recruit and retain specialized security resources, which are in high demand and costly. CSPi Technology Solutions can help you alleviate these challenges with Vital™ Managed Detection and Response (MDR) Service. Vital™ MDR service combines the expertise of our seasoned engineers with the purpose-built ARIA™ SD-Security Advanced Detection and Response (ADR) platform.

Vital™ MDR service powered by ARIA ADR platform, protects your business around the clock, 24x7x365 from attacks, intrusions, and breaches.

Benefits

- **Reduce Risks** - 24x7x365 Threat Detection and Remediation powered by ARIA Advanced Threat Detection and Response (ADR).
- **Cost Savings** – for one flat rate, Vital™ MDR Services provides an entire team of experts and the features of ARIA™ ADR for less of the cost for one Security engineer.
- **Reduce IT Complexity** – stop threats with automation and less human intervention.
- **Improve Operational Efficiency** – mitigate attacks, intrusions, and breaches for a more secure and highly available network.
- **Assure Regulatory Compliance** - auto generates reports required to prove industry compliance.
The Vital™ MDR Advantage

When it comes to protecting your business against the ongoing, evolving threat vectors in play today, establishing a strong security posture can be a momentous feat. Vital™ MDR Service, provides complete end to end threat detection and response that is a step above other solutions on the market today.

- **We utilize leading edge technology to eliminate the restrictions that usually come with managed detection and response solutions.**
  - By tapping into your network we provide total visibility & protection where others can’t see, on-prem, cloud, multi or hybrid cloud and IoT environments.
  - AI and ML based threat models are used to remove complexity and reduce time to detect, analyze, and contain threats before they can cause harm to your environment.
  - The best elements of SIEM, UEBA, NTA, IPS, THREAT INTEL, SOAR are provided and the need for expensive security analysts are eliminated in a single solution.

- **With this better technology comes better service.**
  - More threats are found quicker than our competition to mitigate risks and we back it with SLAs.
  - Operational efficiencies are increased through our unique containment strategy that shut down threats while keeping infected devices fully functioning.
  - Your business is protected against all forms of attacks; Intrusions, Brute Force, Malware, Ransomware, DDOS, Compromised Credentials, Insider Threats, Data Exfiltration, and Policy Violations.

- **Cost effective solutions leads to significant ROI.**
  - For one flat rate and less than the cost of a security engineer, you get our team of experts and a platform that out performs a costly disparate solution.
  - Reduce risk and assured regulatory compliance.
  - Ability to keep all devices (even if infected) fully operational for minimized downtime to your business.

**See how Vital MDR Services powered by ARIA ADR platform can work for you.** Take advantage of a complimentary, 30-minute cyber security posture review, which identifies key areas of risk and what you can do to mitigate them. Click here to register now, or for more information contact us at 1-800-940-1111 or Tech_Solutions@cspi.com.

---

**Key Features:**

- **Comprehensive Visibility** – find threats that matter faster and earlier in the attack life cycle.
- **Proactive Threat Detection** – validate threats progress through the kill chain before setting an alert, eliminating false positives.
- **Automatic Real-Time Threat Containment** – blocks all communication of infected devices, user’s with compromised credentials or applications by deactivating or isolating them offline.
- **Policy Enforcement** – establish automated remediation actions to prevent violations.
- **Continuous Compliance Reporting** - provides industry compliance with PCI, HIPPA, and NIST.
