DATA MANAGEMENT THAT WORKS FOR YOU—HPE NIMBLE STORAGE WITH VEEAM

Keep your mission-critical apps functioning

DOWNTIME AND DATA LOSS CAN BE CATASTROPHIC

According to a survey of IT decision-makers in 2018, 71% of organizations can only tolerate less than one hour of downtime for high-priority applications before invoking a backup. Of these organizations, 47% are confident that their backup and recovery processes are sufficient for their hybrid environment.

DATA PROTECTION IS NOW INCREASINGLY CHALLENGING

Today, the impact of disruption is high. Yet, 77% of organizations don't have an effective data protection strategy in place. What's more, as companies turn to virtualization for improving efficiency, increasing workload performance, and enhancing business continuity, new challenges for data protection and recovery emerge.

Keep your mission-critical apps functioning

TIME TO SAFEGUARD YOUR DATA INTELLIGENTLY

You get application-consistent data protection through a combination of Veeam Backup and Replication and HPE Nimble Storage snapshots. HPE Nimble Storage snapshots saves snapshots of Veeam volumes without impacting production workloads and Veeam makes backups from a secondary HPE Nimble Storage array.

The integration between HPE Nimble Storage snapshots and Veeam software gives you:

- Instant recovery from any one of the snapshots within minutes—downtime reduces while workload availability improves.
- Significantly higher recovery point objectives (RPOs) with multiple up-to-date recovery points—data loss is minimal and your data is up to date.
- Reduced workload availability loss with Veeam’s self-service disaster recovery capabilities.
- Recovery time objectives (RTOs) that are less than five minutes old, and your data recovery is quick, thanks to snapshots that could be just minutes old.

If you’re looking to improve your data protection strategy, HPE Nimble Storage with Veeam offers a near-instantaneous data protection strategy without additional cost or complexity—making it ideal for organizations that want to standardize HPE Nimble Storage for snapshot replication and backup target.

This HPE Nimble Storage with Veeam solution offers a complete, end-to-end data protection strategy to meet critical data recovery and retention requirements.

How does it work?

With the integration between HPE Nimble Storage snapshots and Veeam software, you get:

- Instant recovery within minutes—downtime reduces while workload availability improves.
- Significantly higher recovery point objectives (RPOs) with multiple up-to-date recovery points—data loss is minimal and your data is up to date.
- Reduced workload availability loss with Veeam’s self-service disaster recovery capabilities.
- Recovery time objectives (RTOs) that are less than five minutes old, and your data recovery is quick, thanks to snapshots that could be just minutes old.

The HPE Nimble Storage with Veeam solution offers a near-instantaneous data protection strategy without additional cost or complexity—making it ideal for organizations that want to standardize HPE Nimble Storage for snapshot replication and backup target.

What’s more, you can benefit from simplified billing and support with consumption-based data management when purchasing Veeam and HPE Storage technologies have teamed up to provide a complete, end-to-end data protection strategy to meet critical data recovery and retention requirements.

A DATA PROTECTION SOLUTION THAT KEEPS GIVING

Instant recovery from any one of the snapshots within minutes—downtime reduces while workload availability improves.

Significantly higher recovery point objectives (RPOs) with multiple up-to-date recovery points—data loss is minimal and your data is up to date.

Recovery time objectives (RTOs) that are less than five minutes old, and your data recovery is quick, thanks to snapshots that could be just minutes old.

Tasks made easy with HPE Nimble Storage and Veeam ONE

Intelligent operations—Product prevent, and resolve issues before they happen. Build your own framework—Get accurate forecasts, capacity planning, and complete visibility into your data.

For data that grows—Scale capacity non-disruptively and put your backup data to work.

Enhanced business continuity

Achieve flash performance at a fraction of the cost.

Free-up production infrastructure by making backups from redundant storage.

Accelerate secondary workloads and put your backup data to work.

MAKE THE RIGHT CHOICE NOW

Businesses need data and applications to be available—24/7/365. And the need for reliable data recovery is crucial HPE Nimble Storage with Veeam is the robust solution in this data-driven world—it is fast, simple, and automated giving you an infrastructure that practically manages itself.

For more information on the hardware and software required to implement this solution as well as best practices, configuration guidance, and some performance results read the reference configuration.

Head-free data availability and flash intelligence with Veeam ONE

HEAD-FREE DATA AVAILABILITY

Head-free data availability is a key differentiator for Veeam ONE.

Veeam ONE enhances your VMware infrastructure, providing an intuitive and easy-to-use interface.

HPE InfoSight and Veeam ONE

HPE InfoSight and Veeam ONE provide a comprehensive view of your VMware infrastructure, from a single console.

Hassle-free data management with Veeam and HPE

The combination of HPE Nimble Storage and Veeam makes it easy to manage your data.

Managed IT Services, Professional Services, and Cloud Services - to help you architect and manage a high-performance, highly available, and highly secure IT infrastructure.

CSPI Technology Solutions, a Hewlett Packard Enterprise Silver Partner, and an Aruba Platinum Partner, provides the expertise and service scope — including Managed IT Services, Professional Services, and Cloud Services — to help you architect and manage a high-performance, highly available, and highly secure IT infrastructure.
