

Secondary Storage  
Simplified

# Nutanix Mine

## NUTANIX MINE HIGHLIGHTS

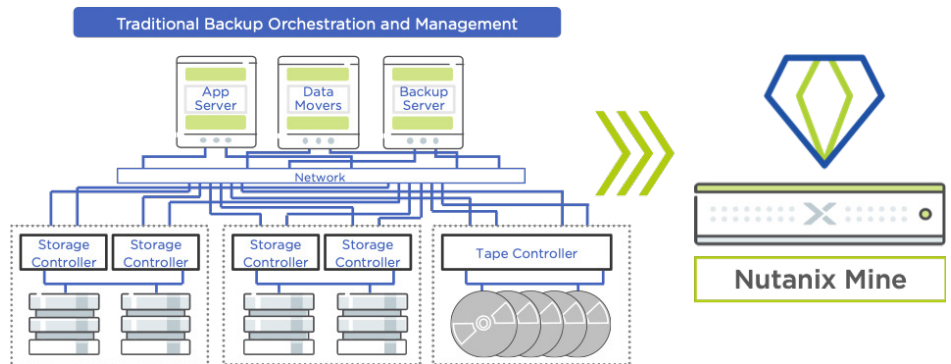

- Open Platform
- Simplified management
- Easy to Deploy and scale

Nutanix Mine provides a single platform for organizations experiencing the benefits of Nutanix Enterprise OS, as these organizations can simply extend their existing integrated data protection to include secondary data backup and archiving all in a turnkey backup solution powered by our platform partners.

*As companies modernize their datacenter with HCI to realize simplicity, performance and scalability, their backup and data protection strategies have often remained siloed from their core datacenter environment. Lack of control over storage and backup lead to long and complex recovery, missed SLAs and security gaps. Nutanix Mine brings simplicity and scale of HCI to address customer's backup and archiving needs.*

With native integration with leading backup solution partners, Nutanix Mine removes a management silo between primary infrastructure and secondary storage environments. Further, Nutanix Mine can be easily deployed managed and scaled to meet most enterprise data availability requirements.

Nutanix Mine simplifies the full lifecycle of data back-up operations, including the initial sizing (performed via Nutanix tools), product procurement, deployment, management, and product support.

## FREEDOM TO CHOOSE

With built-in data protection, security and intelligent data management, Mine enables enterprises to choose the best data back-up software for their organization, and eliminate the time and expense of configuring standalone secondary storage solutions

- Embracing an open platform strategy, Nutanix Mine is a turnkey solution from Nutanix that integrates with popular back-up solutions, including those from Veeam, HYCU, Commvault, Veritas, and Unitrends.
- Nutanix Mine provides data protection for all your workloads, not just those applications running on Nutanix AOS.

## SIMPLIFIED MANAGEMENT

Through tight integration with Nutanix's HCI data fabric and advanced Prism management console, with Nutanix Mine, datacenter managers can rely on a single pane of glass to manage their HCI infrastructure and secondary storage

- A single integrated pane to monitor health of on-premises infrastructure as well as back-up storage.
- Easily remediate plan and your storage runway and capacity.
- The ability to easily scale-out both primary and secondary storage to accommodate business growth.

## DROP IN AND SCALE OUT

Nutanix Mine is a complete turn-key solution, that includes a full-stack hypervisor, hardware, platform OS, management, storage and support. Initial sizing can be done via Nutanix Sizer and product procurement and installations are streamlined.

- Licenses for Nutanix AOS Pro and back-up vendor software are bundled into the Nutanix Mine solution.
- Complements Nutanix's native storage services for unstructured data, which includes Nutanix Files for file-based storage, and Nutanix Buckets delivering a scalable S3-compliant object store.
- Latest generation high density HDDs. Configuration optimized for data protection.

### Nutanix Mine - Small

Form Factor: 2U  
Available Storage: 96 TB

### Nutanix Mine - Medium

Form Factor: 4U  
Available Storage: 192 TB

**NUTANIX**  
YOUR ENTERPRISE CLOUD

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform leverages web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution with rich machine intelligence. The result is predictable performance, cloud-like infrastructure consumption, robust security, and seamless application mobility for a broad range of enterprise applications.
