

# It's time to think differently about your network

Every business knows the network is critical. But is managing it yourself the most effective plan? Or is there a better way?

## Businesses need to:

- Support IoT and business applications
- Boost remote employee productivity
- Maximize IT investments

## But there are challenges:

- Remote connectivity challenges
- Network limitations
- Security risks
- Limited IT budgets

# 92%

of IT decision makers plan on investing in technology as-a-Service<sup>1</sup>

Businesses are looking to change their consumption model

## Introducing Managed Networking Services

Many businesses are opting to augment their teams by partnering with a managed service provider (MSP) and opting for Managed Networking Services.

### Your network as a service

**By partnering with a managed service provider to run your network, you can:**

- Modernize your network quickly
- Focus more time on strategic IT projects
- Minimize upfront technology investments

### We deliver:

- Rapid implementation of resilient, high-performance networking
- Solutions to remote work challenges
- Proactive monitoring and response
- Reliable, ongoing support from a team you trust

## Premium network services powered by industry-leading technology

CSPi Technology Solutions is an innovator driven by a long history of business ingenuity and technical expertise. Distinguished by a team of experts who design, architect and deploy technology solutions that deliver the desired business outcomes to companies large and small. Our motto is simple: We enable businesses to use technology as a strategy, not just a solution. We are your single source for IT Solutions.

We offer a portfolio of market-leading network services based on Aruba ESP — the industry's first AI-powered, cloud-native platform designed to automate, unify, and protect the Edge.

### You get:

- Enterprise-grade performance across WLAN, LAN, and SD-WAN across campus, branch, remote worker, and data center locations.
- More uptime, as AIOps enables us to fix issues before they affect your working day.
- The strongest network security solution on the market to protect your business.

## Solve three top challenges with Managed Networking Services

### Challenge 1

**Keeping remote workers connected, secure, and productive**

#### Solution

Our Remote Work Service delivers secure business-grade connectivity that improves user experience and productivity.

### Challenge 2

**Spend less time troubleshooting and more time strategizing**

#### Solution

We replace your aging infrastructure equipment with a purpose-built network architecture, and provide management and optimization.

### Challenge 3

**Tight budgets mean IT investment is limited**

#### Solution

Subscription-based financing allows you to pay monthly, so you can accelerate your network modernization without a large upfront investment.

## Unleash your network's potential

Learn more about the benefits of moving to Managed Networking Services in our solution overview.
